

## Risk Assessment – String Trail

Hazard	Who might be harmed?	Control Measures
Slipping hazards: access to and from String Trail	All involved	<p>Pre-briefing warning participants and helpers of slippery conditions.</p> <p>Adequate lighting and safety tapes so as Explorers &amp; Scouts can see where they are allowed.</p> <p>Supervision at all times.</p>
General	All involved	<p>If necessary Explorers &amp; Scouts should be taken back to base.</p> <p>String should not be too thin, so as not to cut hands</p>
String trail	All involved	<p>When laying out and using string trail avoid going through brambles, sharp objects and very steep ditches/banks. Check ground for these and make sure trees are safe and will not fall on participants</p> <p>Look where you are walking</p>

Date of Assessment 3/10/2009
